**SOF - STATIC CONDUCTIVE/OIL
RESISTANT/FLAME -STOP**

Static Conductive, Oil Resistant and Flame Stop properties are combined into an exclusive compound that reduces the risk of explosion, fire and oil-related lagging failure. Static electricity that may accumulate on the belt is allowed to drain off through the lagging to ground (in a properly grounded system), helping to reduce the danger of dust explosion. Oil resistance of this compound allows use in moderately oily applications involving the presence of certain hydrocarbons, fats, oils, greases, hydraulic fluids, solvents and moderate chemicals. The outstanding self-extinguishing characteristic of the SOF compound makes it ideal for use in grain and fertilizer handling applications and meets the OSHA standards for static conductivity. The SOF compound has also received MSHA approval for use

Most orders can be cut and shipped the same day.

We stock SOF Lagging in a variety of diameters.

Slide-Lag® provides cost savings underground where space and time requirements are always critical.

We offer Slide Lag kits cut custom to fit your needs.

Our kits include:

Lagging cut to size (per order)

Retainers cut to size (per order)

Bolts, Locknuts, drill bits and allen wrenches
